Customer Journey Map

Stage	Awareness	Consideration	Decision	Service	Loyalty
Costumer Activities	Discovers the app through social media, acquaintances.	Asks other APR administrators, searches Google for management options.	Creates the committee's account and uploads the list of members to the system.	Inputs monthly readings. The system automatically sends notifications and bills.	Recommends to other APR committees. Renews the system's subscription.
Costumer Goals	Find a way to reduce time and errors in the committee's management.	Find a tool that is easy to use and affordable.	Implement the system without causing community pushback or dealing with a complex set up.	Collect payments on time, protect neighbors' privacy.	Maintain a transparent, efficient water service.
Touchpoints	Social media, personal recommendations	H2Organizer landing page, personal recommendations	H2Organizer web platform (Registration / Onboarding).	Administrative web dashboard, Automated notifications.	After-sales service, technical support
Experience					
Pains	Overwhelmed, stressed by the responsibility.	Existing software solutions are too expensive, overly complex.	Anxiety over manual data entry, fear that the community will reject the platform	Uncertainty regarding system reliability in areas with unstable internet connectivity	Lingering frustration over administrative tasks that still require manual effort
Business goal	Capture the attention of APR boards suffering from administrative issues.	Clearly communicate that H2Organizer is easy to use and integrate.	Ensure a frictionless registration and data import process (onboarding).	Guarantee service uptime, successful notifications delivery, and zero billing errors.	Customer retention
KPI	Website traffic, social media reach.	Time spent on the website, number of inquiries.	Conversion rate (completed registrations), Average time to set up a committee.	Monthly Active Users, % of notifications and bills successfully sent.	Net Promoter Score, % of renewed subscriptions.
